

## Abstract

A semi-disposable and/or non disposable diaper system for babies and adults comprises a non-disposable diaper cover, made of PVC and polypropylene completed by a double diaper system. The double diaper system comprises one non-disposable diaper made of layers of gauze one on top of the other or of layers of gauze and absorbent material of polypropylene. Another disposable diaper of the double diaper system is made of cellulose and super-absorbent polymer. Both diapers are designed in an anatomical shape and size that together with the diaper cover work as only one piece.
